1. Claims 1-27 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The aspect in claims 1 and 27 of “simultaneously dissolving one or more kinds of bioresorbable polymers and a low molecular weight oligomer in an organic solvent to form a bioresorbable polymer solution” appears to lack support in the disclosure as filed.

Applicant states that support for the above limitation can be found at page 12 of the specification in Example I. In this example, it is stated that “15 g of polycaprolactone (PCL) having a molecular weight about 80,000 and 15 g of polyethylene glycol (PEG) having a molecular weight of 1000 (an oligomer) were added to 70 g of THF, which was stirred thoroughly at room temperature to form a PCL solution containing PEG oligomer”. But this disclosure does not reveal anything regarding simultaneity of the addition of the PCL and PEG to THF.

2. Applicant's arguments filed June 10, 2006 have been fully considered but they are not persuasive. Applicant's arguments concerning the Ma reference are considered to be moot by the examiner based on the revised ground of rejection introduced in this Office action.
